

Environmental Policy

Advanced Assembly Solutions Ltd are committed to ensuring that its operations consider the possible impacts on the environment.

The Company will:

- Ensure that all relevant Environmental Legislations and Regulations are applied
- Operate the Business in an environmentally sensitive manner
- Purchase and use environmentally friendly materials where possible
- Raise the awareness of staff so that everyone may be involved
- Reduce Energy Usage by increased Energy Efficiency
- Re-use or Recycle Waste when possible
- Use raw materials in a manner that reduces waste
- Reduce water usage by water recycling wherever possible
- Reduce heating and water heating by reuse of waste heat
- Ensuring that waste materials are properly disposed of in an appropriate manner

The company has developed action plans based upon the above principles and will aim for Continuous Improvement.
